Career Aspirations:

I am a highly motivated and recent graduate industrial designer that likes to think outside the box, is always up for a challenge, enjoys problem solving and creating new solutions based on the needs of clients. I am able to work well in a group setting as well as autonomously in an industrial design research and learning environment. I am well experienced in design drawing, CAD modelling, prototyping, well-equipped in IT, which includes coding and electronical prototyping. I can understand and create basic computer code. I am also experienced in Adobe design and media software, as well as the Microsoft Office software.

In my career, I aspire to create and design solutions to address industry, business and community challenges through sound research, clever design, and innovation. I am committed to the sustainable use of natural resources for projects that I am involved in. When it comes to creating solutions it is not always about how it functions, but whether you can incorporate a sense of self-awareness in your solutions. I thrive on being able to learn new things and I always want to find ways to improve my own capabilities and thus maximise my own contribution in my work and community I live in. I bring a positive, can do attitude towards everything that I am in involved in and constantly strive to bring out the positives in those around me.

Capabilities:

- I find it easy to build relationships with people around me and can maintain a strong workflow.
- Having to constantly work in a group setting and autonomously during my academic journey, it has equipped me with the necessary skills to develop a meaningful outcome.
- Juggling work, full-time university, and weekend sport over the last five years, I have acquired quality time management skills.
- I have had to demonstrate excellent verbal and illustrated communication skills through University presentations and working in customer service, in the retail sector.
- I have been involved in a number of design projects that have required me to familiarise myself with different materials and mediums; such as, CAD modelling, physical prototyping, 3D printing and drawing.
- I like to think outside the box and have creative solutions to complex problems, however, I can accept constraints in projects I am involved with.
- Needing to research specific fields and products before creating a design for myself, has given me a better understand in how to conduct my own research.
- Strong computer literacy with a solid understanding and experience in a number of programs, see my program proficiencies section.

Program Proficiencies:

- CAD Modelling Software (Autodesk Fusion 360, Solidworks, SketchUp)
 - Microsoft Office Package (Word, PowerPoint, Excel, Outlook, Publisher, OneDrive)
 - Adobe Creative Cloud (Photoshop, Illustrator, InDesign, Premiere Pro/Rush, After Effects)
 - Coding Software (Visual Studio Code, Arduino, Processing, Cycling '74 Max)
 - Coding languages (Java, HTML, JavaScript, CSS)
 - Google Software Package (Google Drive, Docs, Slides, Forms, Gmail)
 - Website Development (WordPress, Elementor, HTML)
-

Academic Qualifications:

- | | |
|-------------|--|
| 2020 – 2021 | Bachelor of Industrial Design Honours
RMIT University, Melbourne, VIC <ul style="list-style-type: none">- In-depth research in my chosen field.- Developed clay modelling prototypes.- CAD modelling using Fusion 360.- Advanced 3D printing. |
| 2017 – 2020 | Bachelor of Industrial Design
RMIT University, Melbourne, VIC |
| 2012 – 2016 | Year 8 – Year 12 (VCE)
Emerald Secondary College, Emerald, VIC |
-

Accomplishments:

- Honours Research Project: I redesigned a gaming controller for competitive players that hold their controller with an alternative hand grip. For further information on my Honours design project, please visit the website listed above.
 - Vice-Captain D-Grade Emerald Cricket Club (2020/21)
-

Employment History:

- | | |
|----------------------|--|
| Dec 2018 – July 2021 | Sales Assistant, Emerald Newsagency, VIC <ul style="list-style-type: none">- Opening and closing the store.- Stacking and monitoring stock inventory.- Trusted to manage daily operation of the store on my own.- Required to lead and train new staff members. |
| Nov 2016 – Jan 2020 | Cook, Emerald Fish and Chippery, VIC <ul style="list-style-type: none">- Working in a fast-paced environment.- Food preparation and cooking.- Serving customers, including taking phone orders. |
